

Schneider-Digital: We do Photogrammetric Hardware Solutions

Josef J. Schneider – CEO

We are – a full-service GeolT hardware provider

... for professional 4K, 3D-display and GeolT hardware

- ✓ As a specialist IT hardware manufacture, we are principal software vendors neutral
We perfectly networked to all major geospatial and hardware vendors
- ✓ Focused to provide best display and processing hardware price/performance,
matching the software requirements to user and project resources
- ✓ We are passionate about stereoscopic visualization and data interaction,
act as development partner for many software companies!
- ✓ We are driving development: Bi-directional, active collaboration with soft- and hardware
manufacturers, connecting hardware capabilities to geospatial applications.

Compatible with all operating systems – from Windows XP to Windows 11

- ✓ PLANAR SD monitors and the Schneider Digital 3D PluraView use the **passive Stereo** principle with dual screens for full stereo resolution per eye and passive (no batteries), cross-polarized glasses.
 - ✓ very light-weight, comfortable glasses ⇒ no flickering ⇒ no headaches
 - ✓ bright & contrast-rich image ⇒ daylight compatible

New! – Immersive 3D-Stereo in 4K for Professional Applications

3D GlobeView by Schneider Digital

80" passive 3D-Stereo Monitor

- ✓ UHD-resolution, 8 MP (3.840 x 2.160)
- ✓ Native 4K-Resolution @ 120Hz with 10bit
- ✓ Circular line-by-line polarization 3D technology
- ✓ Optional Head-Tracking and gesture control
- ✓ Innovative, height-adjustable mounting solution

Next Generation of Digital Stereoplotters

Complete stereo workplace equipment by Schneider Digital

Photogrammetric Workstations (PW)

✓ **Workstations** → tailored to your specific requirements!

- CPUs by Intel or AMD – your choice!
- Professional graphic cards by NVIDIA or AMD
- All options for internal storage & network connectivity
- Ultra-compact to full-size workstation tower

✓ **3D Stereo-monitors** 22" & 24" 27" & 28"

3D PluraView

✓ **Stealth 3D-controllers**

High-End Workstation-Solutions for professionals

- Latest Intel Xeon, AMD EPYC, AMD ThreadRipper processor technology
- High-speed CPU's (up to 56 cores on Intel, up to 96 cores on AMD)
- Up to 2-TB fast DDR-5 ECC memory
- Up to four (4) high-end graphics cards for CUDA or OpenCL applications in a single workstation
- High performance RAID with up to 24-Gb/s. Transfer rate (SAS 4.0 technology) on request also with lightning-fast SSD (Solid State Disks) with up to 96-TB of NVMe disk space per unit
- Optionally - ultra-fast 25 or 100-Gbit/s LAN connection to ultra-fast file servers
- Highest quality for all components
- Server and cluster solutions for your requirements!

UltraMap processing equipment by Schneider Digital

UltraMap Processing Clusters

- ✓ Scalable and upgradable processing nodes (each 16 up to 96 CPU cores)
- ✓ Each processing node upgradeable with up to 4 HPC GPUs
- ✓ Fast UM network switch and corresponding network cards (25 or 100-Gbit/s)
- ✓ Fast File server for UM processing nodes (SSDs)
- ✓ Backup server for longer-term storage (HDDs)

UltraMap Osprey 4.1: Processing load & storage example

Project example: Osprey4.1 flight, AOI 4700 sq.km, 7.5cm nadir resolution

- ✓ Approx. 60,000 nadir images, plus 4 x 60,000 oblique images
- ✓ Lvl00 nadir+oblique dataset = 3.1-GB on FDU (uncompressed)
 - 📍 Lvl03 nadir+oblique RGB, 8bit = 2.5-GB / 150-TB for AOI
 - 📍 Lvl03 Nadir-only RGB-I (288MPx), 14bit = 1.6-GB / 100TB for AOI
- ✓ Add multiple products and versions for DTM/DSM, Ortho, 3D mesh – **1 PetaByte storage is realistic!**
- ✓ Translated to a fast file-server requirement (SSD-based) = 50 to 100-TB (10 to 20 **SSD** 8-TB drives)
- ✓ Translated to a backup server requirement (HDD-based) = 1-PB (50 to 60 **HDD** 20-TB drives)
 - 📍 Consider RAID-50 or RAID-60 with data redundancy for backup server
 - 📍 Consider RAID-0 for higher workloads / high-speed for SSD file-server (>128 UltraMap cores)

CopyStation / CopyStation PRO mobile Workstation

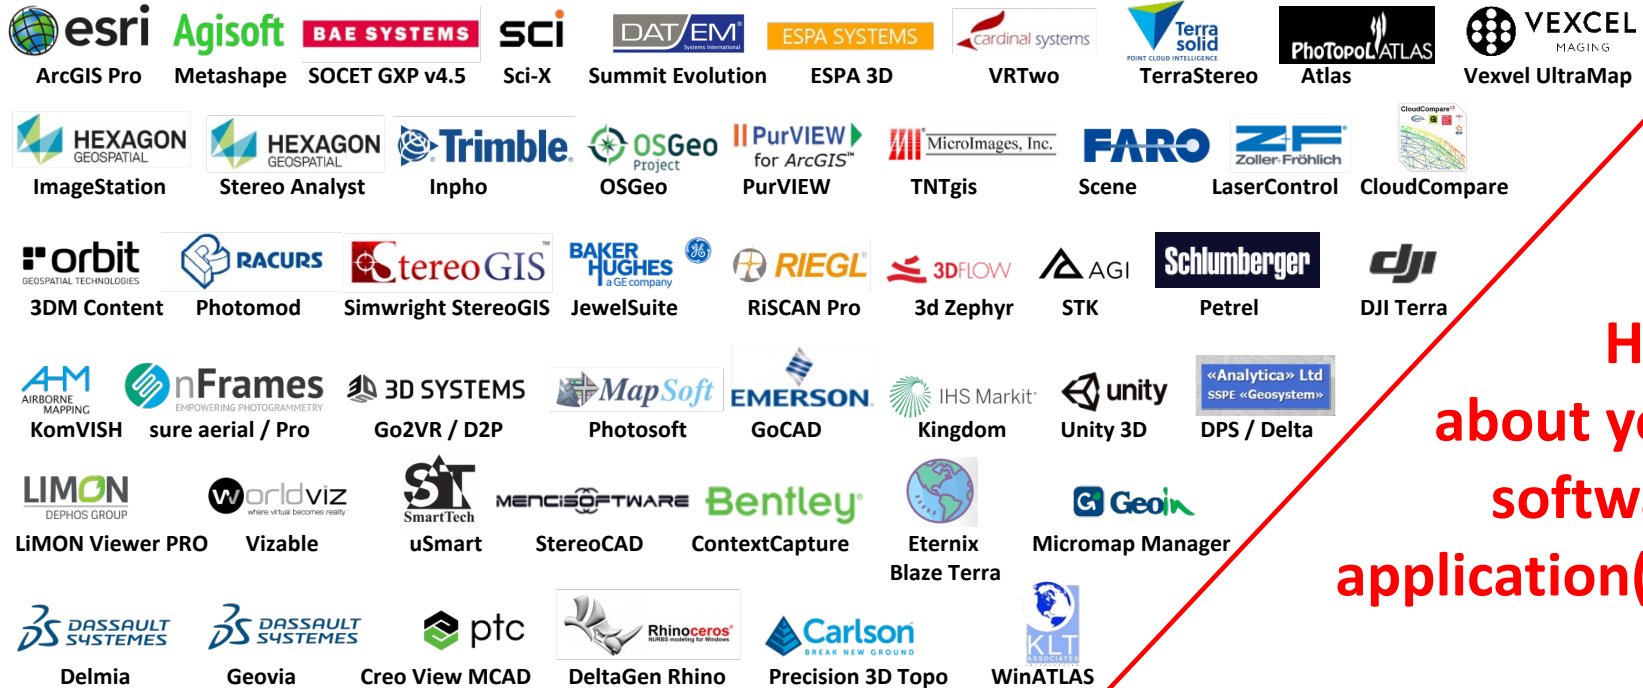

Professionally-built compact workstation for remote area operations

- ✓ Hard-shell trolley, easily transportable
- ✓ **CopyStation:** primarily intended to offload/copy FDU to internal NVMe (up to 96-TB internal NVMe)
- ✓ **CopyStation PRO:** adds serious **processing** capability, e.g. fast Lvl00 to Lvl02 (or Lvl03) image copies
 - Up to 64-cores @ 3.5GHz and 1-TB of 3200MHz memory
 - SAS 12Gbit/s port option for external NAS connectivity
 - IPMI remote management onboard
 - Professional Stereo graphics card configurable
 - 270 mm (W) x 212 mm (H) x 393 mm (D)

3D PluraView – compatible geospatial stereo-software

Monthly updated list for stereoscopic software & vendors, current PDF on our website!

**How
about your
software
application(s)?**

Thank you for your attention!
