

Hi David

You should have received 2 wetransfer ftp server links download both then rename files as below

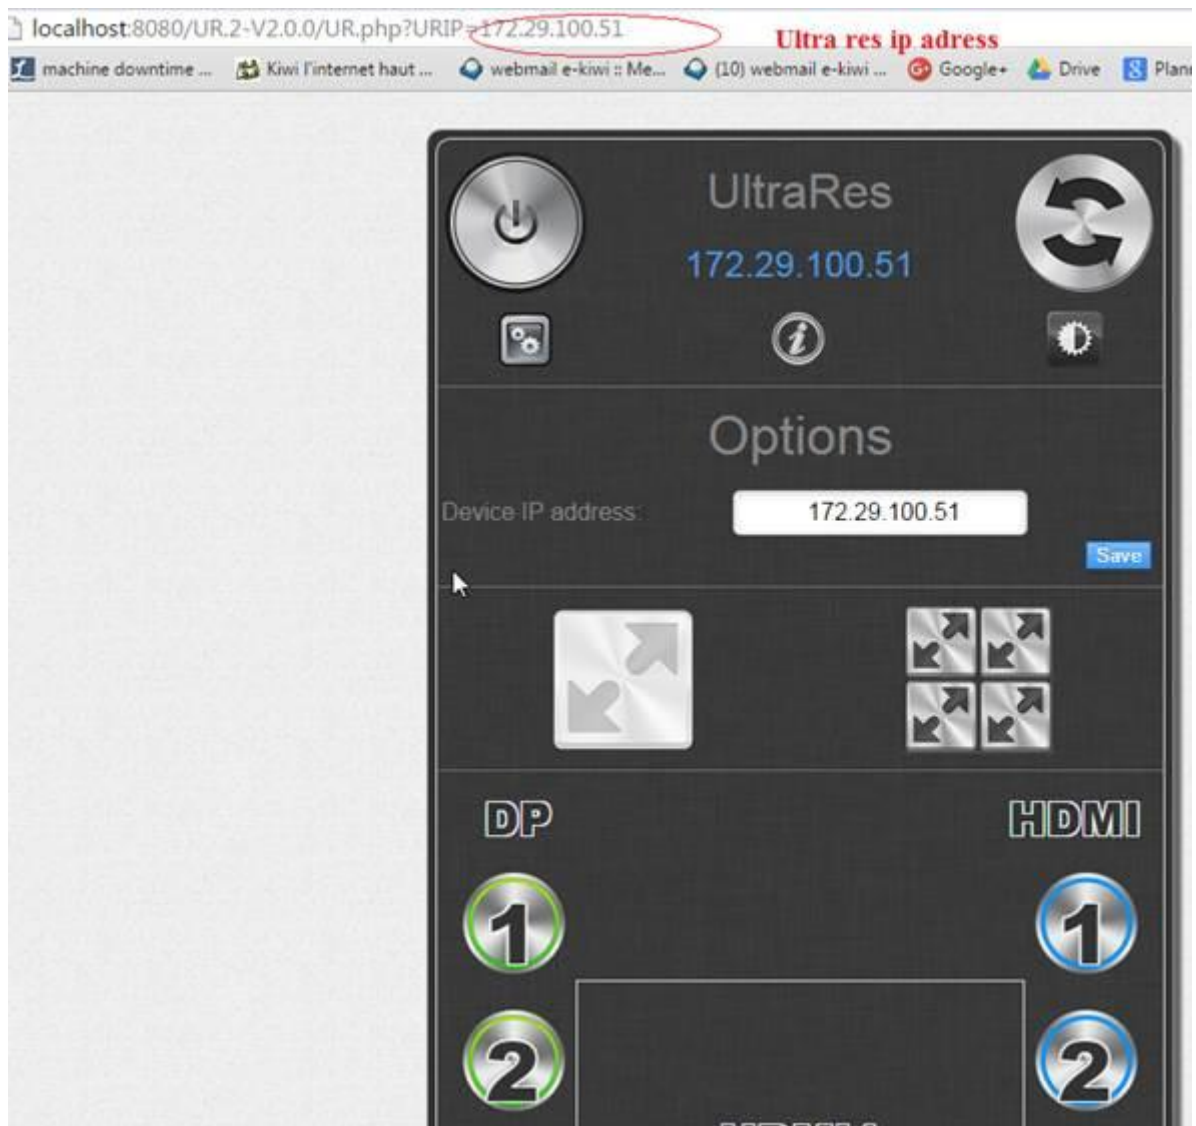

UR.2-V2.0.0 > UR.2-V2.0.0.exe

USBWebserver v8.6.z > USBWebserver v8.6.zip

Run the auto extractable archive file UR.2-V2.0.0.exe, unpack USBWebserver v8.6.zip then install the webserver on the computer you wanna drive the Ultra Res .Copy / paste the entire folder into the Usb webserver directory as it shown bellow .

Then run the Php code locally, et Voila !

Indeed this is a non official Planar tool and as non official things Blabla. Feel free to change whatever you want in the php code .
Enjoy
